

# Mentor Meeting 12/5

## **Progress**

We were all focusing on our other classes, so basically no implementation progress has been made.

## **Items to talk about**

- How to most efficiently get things done.
  - We have a rough idea of the intended division of labor, but our availability is staggered (e.g. Ben can't work until Friday, Damien can't work on Saturday). How to deal with this challenge.
- Our critique
  - Mostly straightforward fixes, for the most part?

## Minutes
